Ala Din Habibi

Mobile Software Engineering Student
Tunis, Tunis, Tunisia

Summary

As a passionate software engineer, I thrive on exploring every facet of the tech world. I have experience working across a wide range of IT domains, from system architecture and cloud services to full-stack development. I enjoy tackling diverse challenges and am always eager to apply my skills to new and exciting projects.

Experience

GALYLIO AI

Mobile Application Developer Intern
January 2026 - Present (4 months)
Tunis, Tunisia

Participated in the development of the mobile application for Dronia, an AI-based drone management platform. My work focused on mobile UI development, API integration, and implementing features that enable users to monitor and interact with drone-generated data in real time.

AlBaraka Enseigne

Web Developer
December 2025 - December 2025 (1 month)

Developed a showcase website for a signage solutions company using Next.js and Tailwind CSS.

Implemented a public product catalog with images, videos, sizes, and detailed descriptions.

Built a secure admin dashboard with authentication (JWT), CRUD operations, media management, and notification handling.

Appaxis Innovations

iOS Mobile Developer – Engineering Internship
June 2025 - August 2025 (3 months)

Designed and developed user interfaces using SwiftUI for an iOS application.
Integrated and consumed APIs documented via Swagger to ensure seamless communication between the frontend and backend.
